The College of Architecture and Graduate School of Architecture & Urban Design at Washington University invite applicants for a senior-level faculty position at the rank of Associate or Full Professor with a focus on energy-efficient advanced building systems, systems integration, and architectural design. The selected candidate will hold an I-CARES (International Center for Advanced Renewable Energy and Sustainability) endowed professorship and teach upper-level comprehensive design studios and coursework in building systems and systems integration. The selected candidate will be expected to pursue a research agenda that applies innovation in building systems and architectural design to the primary I-CARES objectives of advancing collaborative and interdisciplinary research around energy, the environment, and sustainability. The I-CARES Professor will pursue externally sponsored research funding and will work collaboratively with I-CARES partners across the University and with its regional and international partners. In addition to teaching and research, the I-CARES Professor will contribute to the graduate and undergraduate architecture programs through curriculum development, academic advising, and related academic committee work. The appointment will begin in fall 2015.

The I-CARES Professor is a critical position within the graduate architecture program and, as such, the School seeks a leader in the field. Candidates should demonstrate high-level expertise as well as significant practice and/or a research record related to energy-efficient architectural design and building technologies, including the areas of structure, enclosure, climate control (active and passive), and light (natural and artificial). Qualified candidates should possess a minimum of a master’s degree or equivalent advanced degree in architecture or a closely related field. Candidates should also demonstrate the capacity for excellence in teaching at the university level. The School seeks an exceptionally qualified and diverse faculty; women, minorities, protected veterans and disabled candidates are strongly encouraged to apply. Salary and rank will be commensurate with experience.

The Master of Architecture degree program is a nationally ranked, accredited professional program that attracts students from around the world. International semester programs are located in Buenos Aires, Barcelona, and Helsinki. The Master of Landscape Architecture and Master of Urban Design programs afford joint degree options in the Graduate School, which also facilitates joint degree opportunities with Engineering, Social Work, and Business. The College of Architecture is a leader in undergraduate interdisciplinary design education, bringing together architecture, art, and liberal arts and sciences.

The College of Architecture and Graduate School of Architecture & Urban Design are part of the Sam Fox School of Design & Visual Arts, which also houses the College and Graduate School of Art and the Mildred Lane Kemper Art Museum. The Sam Fox School offers rigorous art and architecture education at both the undergraduate and graduate levels within the context of an independent, nationally prominent research university.

Applications must be submitted online via Slideroom (https://samfoxschool.slideroom.com/). Materials requested include a cover letter, curriculum vitae, statement of research interests, and portfolio samples of both academic and professional work. Review of applications will begin November 14, 2014, and continue until the position is filled.

Washington University in St. Louis is committed to the principles and practices of equal employment opportunity and affirmative action. It is the University’s policy to recruit, hire, train, and promote persons in all job titles without regard to race, color, age, religion, gender, sexual orientation, gender identity or expression, national origin, veteran status, disability, or genetic information.
